OBJECTIVE

The Systems Analysis Directorate was tasked 1,2 to determine:

- a. The cost of producing XM204 Howitzers to replace the Army's current assets of M101A1 and M102 Howitzers.
- b. The potential net revenues (total revenues minus overhaul costs) of selling overhauled M101A1 and M102 Howitzers via Foreign Military Sales (FMS).

INTRODUCTION

The Development Acceptance (DEVA) In-Process Review (IPR) for the XM204 Howitzer, a soft recoil 105mm towed howitzer, (shown in Figure 1) is scheduled for December 1977. Depending on the Development and Operation testing and other considerations such as higher priority systems and the availability of funds, the Research, Development and Acquisition Committee (RDAC) could decide to support the production of the XM204 Howitzers. If the XM204 Howitzers are produced and fielded, the current Army assets of 105mm howitzers (Table 1)3,4 would be replaced, and according to the Army Materiel Plan Summary (SAMPAM)⁵, the potential distribution of Army 105mm howitzer assets in FY83 would be similar to that shown in Table 2. If the XM204's are fielded, there is the possibility of overhauling and selling existing Army assets of 105mm howitzers to FMS customers and diverting that revenue to production of XM204 Howitzers. This report addresses the potential net revenues which could be received from FMS for existing 105mm howitzers assets and the investment which would be required to produce and field XM204 Howitzers.

Army Materiel Plan Summary, 3 January 1977, Printout numbers G01800000000, G0180100000, G0180200000, and G0180300000, CONFIDENTIAL

ALTERNATIVES

Four alternatives (ALT 1, 2, 3, and 4) were identified for this analysis and are listed in Table 3. Each alternative addresses the replacement of the current Army assets of 105mm howitzers with new production of XM204 Howitzers.

ALT 1 addresses the replacement of 105mm howitzers in Active Army, Reserves, and National Guard units with XM204 Howitzers. This is done in accordance with potential distribution of 105mm howitzers as found in the 3 Jan 77 SAMPAM (refer to Table 2).

ALT 2 addresses the replacement of 105mm howitzers with XM204 Howitzers in Active Army only while retaining a mix of M101A1 and M102 Howitzers in the Reserve and National Guard units.

ALT 3 addresses the replacement of all MlOlAl Howitzers in current Army assets with KM204 Howitzers, while retaining the current assets of MlO2 Howitzers.

ALT 4 addresses the replacement of all M102 Howitzers in current Army assets with XM204 Howitzers, while retaining the current assets of M101A1 Howitzers.

For each of the four alternatives, the potential distribution of Army 105mm Howitzers is displayed in Table 4. In addition, for each alternative, the production schedules of XM204 Howitzers, the overhaul schedules for the M101A1 and M102 Howitzers, and the FMS schedules for overhauled M101A1 and M102 Howitzers which were used in this analysis are displayed in Appendix A, Tables A-1, A-2, A-3, and A-4.

APPROACH

The analysis was consistent with guidelines in AR 11-28, Economic Analysis and Program Evaluation for Resource Management⁶, in that all input data were converted to constant FY77 dollars and all monies to be expended in the future years were discounted to FY77 by applying the 10% discount factors.

The investment costs of XM204 Howitzers include the Initial Production Facilities (IPF), production costs, initial provisioning and training, and publications. The per unit production cost estimate includes the hardware and support costs, test assumition, and first destination transportation.

⁶AR 11-28, Economic Analysis and Program Evaluation for Resource Management, 15 Jan 76.

TABLE 3. ALTERNATIVES

ALT 1:

- a. Produce 1,118 KM204 Howitzers for Active Army Reserves, and National Guard,
 - b. Overhaul 745 M101Al Howitzers and 306 M102 Howitzers.
 - c. Sell, via FMS, the overhauled M101Al and M102 Howitzers.

ALT 2:

- a. Produce 793 XM204 Howitzers for Active Army only.
- b. Overhaul 300 M101A1 and 426 M102 Howitzers from current Active Army assets.
 - c. Sell, via FMS, the overhauled M101A1 and M102 Howitzers.

ALT 3:

- a. Produce 812 XM204 Howitzers for Active Army, Reserves, and National Guard.
 - b. Overhaul 745 M101A1 Howitzers from current Army assets.
 - c. Sell, via FMS, the overhauled M101Al Howitzers.

ALT 4:

- a. Produce 651 XM204 Howitzers for Active Army, Reserves, and National Guard.
 - b. Overhaul 584 M102 Howitzers from current Army assets.
 - c. Sell, via FMS, the overhauled M102 Howitzers.

The per unit overhaul cost estimate for both the M101A1 and M102 Howitzers includes labor expenses, general and administration (G&A) expenses, indirect maintenance expense (IME), material, test assumition, and transportation charges.

The selling price of overhauled MIOIAI and MIO2 Howitzers for Foreign Military Sales (FMS) was calculated by applying the methodology used for the FMS of MIOIAI Howitzers in 1976,7,8 That is, the FMS selling price was determined as 80% of their respective standard prices plus the cost of overhaul and test ammunition. Then, since FMS prices are subject to change, the FMS prices were parameterized to demonstrate how changes in selling price affect the potential revenue received.

ASSUMPTIONS

It was assumed that:

- a. The production schedule for XM204 Howitzers is feasible when considering the workload of the appropriate manufacturing facilities.
- b. The XM204 Howitzer production and delivery schedules, the M101Al and M102 Howitzer overhaul schedules, and the FMS delivery schedules shown in Tables A-1, A-2, A-3, and A-4 are valid for this analysis.
- c. For FMS, the M101A1 and M102 Howitzers will be delivered the same year in which they are overhauled.
- d. Cost of the test ammunition for the overhauled M101A1 and M102 Howitzers is equal to the cost of test ammunition for the XM204 Howitzer.
- e. The per unit production cost for the XM204 Howitzers is valid for production of 1,118 howitzers for ALT 1, as well as for production of lesser quantities of howitzers for ALT 2, 3 and 4.
- f. The cost for IPF, initial provisioning and training, and publications for the XM204 Howitzers are applied equally to all four alternatives.
- g. Transportation costs, estimated as 3% of the Hardware and Support (Engineering and Production) Costs of the new production of XM204 How-itzers, are applied equally to the M101A1, M102, and XM204 Howitzers.

PONECON, Mr. Aukland, DRSAR-MMH and Mr. Trier, DRSAR-SA, subject:
Standard Price of M101A1 and M102 Howitzers and Determination of FMS
Selling Price, dated 25 Apr 77.

⁸DALO-ILP MSG 132055Z Sep 76. CONFIDENTIAL.

h. Transportation costs for FMS will be paid by the foreign country and are, therefore, not included in the estimation of net revenues received from FMS of M101A1 and M102 Howitzers.

DATA

The following data were used in this analysis:

- a. Current Army assets of 105mm howitzers (Table 1) are 745 M101Al and 584 M102 Howitzers.
- b. XM204 Howitzer production and delivery schedules, M101A1 and M102 Howitzer overhaul schedules, and FMS schedules for FY81 through FY87 (Tables A-1, A-2, A-3 and A-4).
- c. FMS selling prices for overhauled M101A1 and M102 Howitzers (Table A-5) are \$31,193 and \$126,040, respectively.
- d. Overhaul costs for M101A1 and M102 Howitzers 9 (Table A-6) are \$12,820 and \$36,760, respectively.
- e. XM204 Howitzer estimates are \$121.5K for new production costs per unit, \$6.29 M\$ for Initial Production Facilities (IPF), \$2.9 M\$ for initial provisioning and training, and \$3.4 M\$ for publications (Table A-7).
- f. Estimated transportation cost is \$3.6K per weapon for the XM204 Howitzer, the M101A1 Howitzer, and the M102 Howitzer.

RESULTS

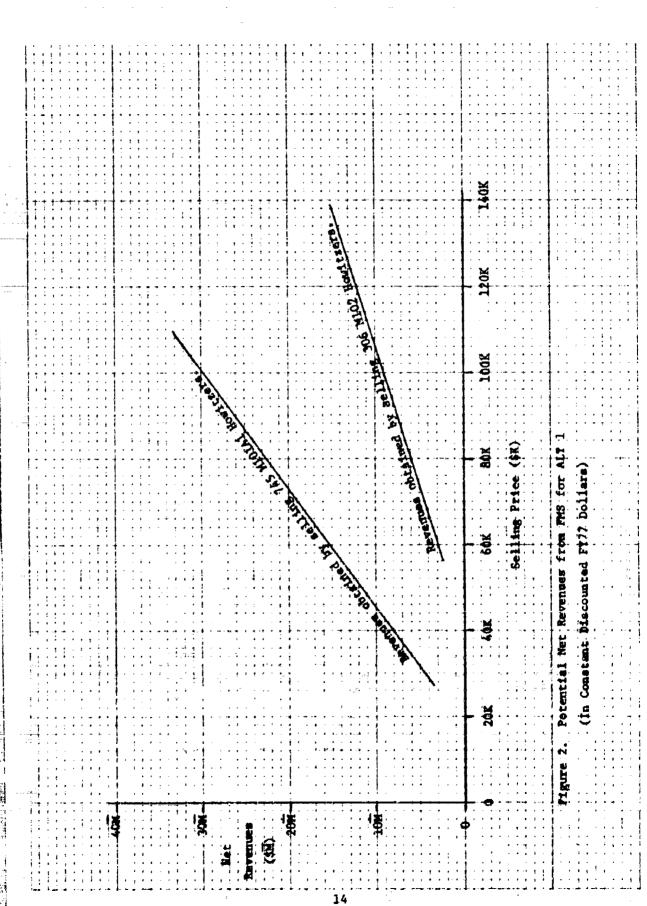

Table 5 displays the investment costs that would be incurred to procure and field XM204 Howitzers for each alternative. Production costs were calculated each year according to the number of howitzers produced (refer to production schedules in Tables A-1, A-2, A-3, and A-4). All costs were then discounted to constant FY77 dollars.

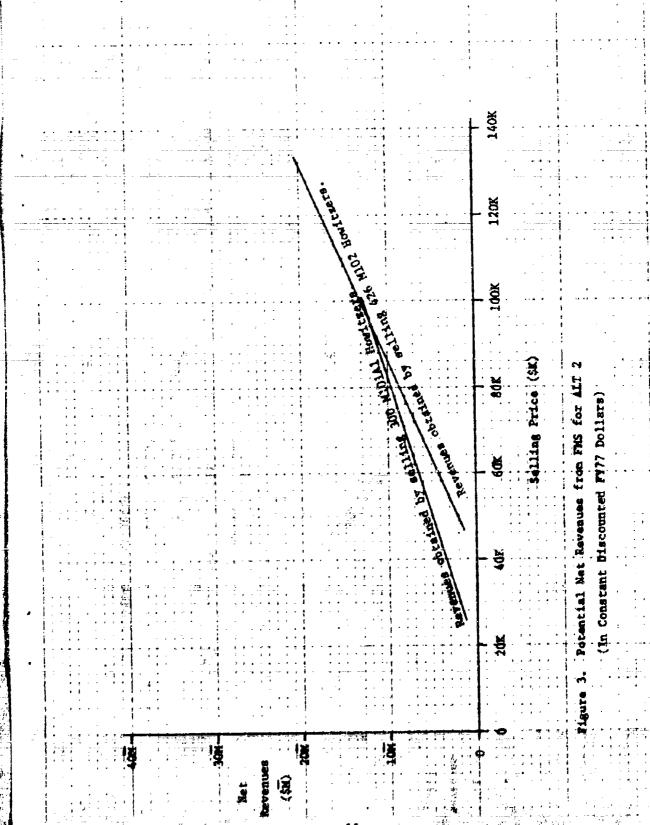

The costs of overhauling the M101A1 and M102 Howitzers in preparation for FMS customers are displayed in Table A-8. These overhaul costs would be paid out of the revenues obtained from the FMS customers. Figures 2, 3, 4 and 5 display the potential net revenues (total revenues (Figures B-1, B-2, B-3 and B-4) minus overhaul costs (Table B-2)) which could be received from FMS of M101A1 and M102 Howitzers for ALT 1, 2, 3 and 4, respectively. Each figure displays two curves (straight lines); one shows the potential net revenues obtained by selling M101A1 Howitzers, and the other shows the potential revenues obtained by selling M102 Howitzers.

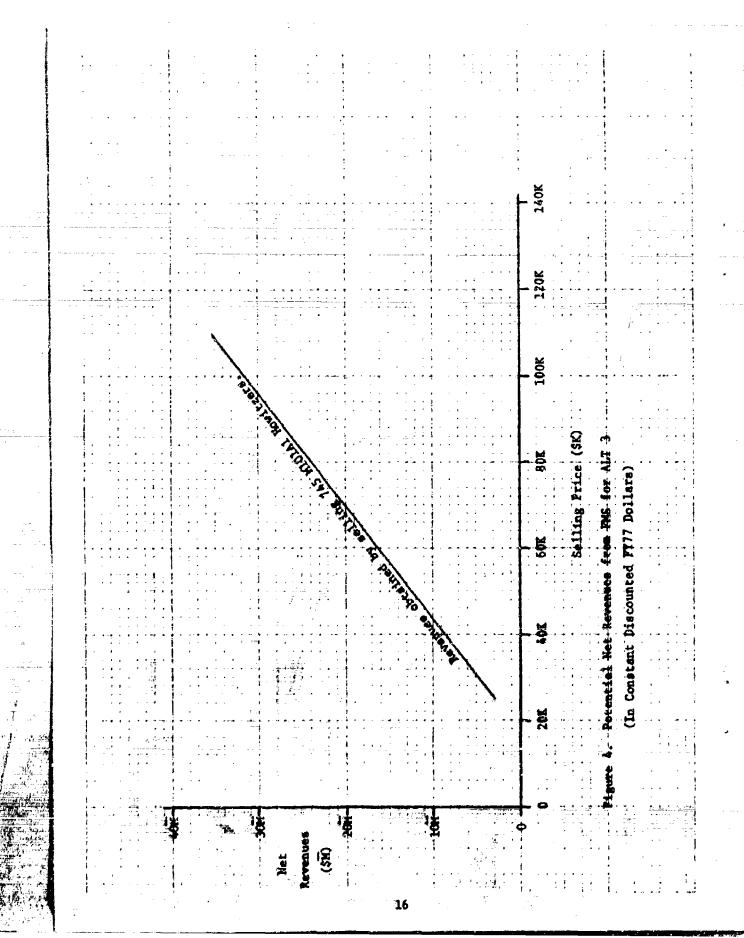

DF from DRSAR-CPE to DRSAR-ASA, subject: 105mm Howitzer Production, XM204, dated 12 Apr 77.

はない はん

In order to exemplify the use of the figures, two cases shall be discussed. In the two cases, different FMS selling prices will be used to show how revenue varies with selling prices. The selling prices used are:

	M101A1	M102
Case 1	∿\$31K	∿\$126K
Case 2	∿\$97K	∿\$ 97K

The values for Case 1 were determined as 80% of their respective standard prices plus the cost of overhaul and test ammunition (see Table A-5). The values for Case 2 were determined as 80% of new production costs of 204204 Hewitzers. Net PMS revenues corresponding to the selling prices were obtained from Figures 2, 3, 4 and 5 and are displayed in Table 6.

TABLE 6. NET FMS REVENUE (\$M)
(In Constant Discounted FY 77 Dollars)

		** .	Quantit M101A1	y Sold M102	Revenues for Case 1 M101A1 + M102 = TOTAL	Revenues for Case 2 M101A1 + M102 = TOTAL
	alt	1	745	306	4.8 + 13.0 = \$17.8 M	$28.5 + 8.6 = $37.1\overline{M}$
1	ALT	2	300	426	$2.0 + 18.6 = $20.6 \overline{M}$	$12.2 + 12.2 = $24.4\overline{M}$
	ALT ALT		745	586	5.1 + 0.0 = \$ 5.1 <u>H</u> 0.0 + 26.0 = \$26.0M	$\begin{array}{cccccccccccccccccccccccccccccccccccc$

The net revenues shown in Table 6 would probabily go to the US Government General Revenue Fund for subsequent Congressional appropriation. If these funds were reverted to the XM204 program, the net costs of each alternative could be calculated as is done in Table 7.

TABLE 7. ALTERNATIVE NET COSTS FOR XM204 HOWITZERS (In Constant Discounted FY 77 Dollars)

Case 1:	ALT 1	ALT 2	ALT 3	ALT 4	
XM204 Fielding Costs Not FMS Revenues	\$81.1M 17.8	\$62.9M 20.6	\$64.0 1 5.1	\$54.2M 26.0	- 1 - 1
Wet Costs	\$63.3M	\$42.3M	\$58.9M	\$28.2M	
Case 2:					
XM204 Fielding Costs Net FMS Revenues	\$81.1₩ 37.1	\$62.9M 24.5	\$64.0M 30.4	\$54.2M 17.1	
Net Costs	\$44.0M	\$38.5M	\$33.6H	\$37.1M	

SUMMARY

For each alternative plan of fielding XM204 Howitzers, the discounted investment costs were determined. These costs included Initial Production Facility (IPF) costs, production and transportation, initial provisioning and training, and publications. It was determined that:

- a. For ALT 1, if 1,118 XM204 Howitzers were produced and delivered to Active Army, Reserve, and National Guard units, an investment of \$81M will be required.
- b. For ALT 2, if 793 XM204 Howitzers were produced and delivered to Active Army units only, an investment of \$63M would be required.
- c. For ALT 3, if 812 XM204 Howitzers are produced and delivered to Active Army, Reserve, and National Guard units to replace all M101A1 Howitzers, an investment of \$64M would be required.
- d. For ALT 4, if 651 xM204 Howitzers were produced and delivered to Active Army, Reserve, and National Guard units to replace all M102 Howitzers, an investment of \$54M would be required.

For each of the four alternative plans addressed in this analysis, potential net revenues (total revenues minus overhaul costs) were calculated for the sale of overhauled M10iAl and M102 Howitzers to Foreign Military Sales (FMS) customers. Figures 2, 3, 4 and 5 display those net revenues for ALT 1, 2, 3 and 4, respectively.

According to current policy, the FMS selling price for overhauled M101A1 and M102 Howitzers would be \\$31K and \\$126K, respectively (Table A-5). At these selling prices, the potential net revenues which could be received for ALT 1, 2, 3 and 4 are \$18M, \$21M, \$5M, and \$26M, respectively. It should be noted that potential revenues depend directly on the quantities of howitzers sold. For example, if M102 Howitzers could not be sold (say, for example, due to too high a price or low desirability), and only M101A1 Howitzers were sold, the potential net revenues for ALT 1, 2, 3 and 4 would be only \$5M, \$2M, \$5M, and \$0M, respectively. Lastly, if different selling prices could be justified, the subsequent potential net revenues could be obtained from Figures 2, 3, 4 and 5 as demonstrated in this report.

Obtained from MAJ Roddy, DRDAR-XM (RIA).

plus 1/2 of the number of XM204 Howitzers produced that same year (e.g., in FY83, the number of Howitzers delivered bumber of Bowitzers delivered in a given year equals 1/2 of the number of XM204 Howitzers produced the prior year -1/2(50) + 1/2(168) - 109).

The overhaul schedule is calculated by multiplying the ratio of the number of Hilliah and Mi02 Howitzers replaced and the number of XH204 Howitzers fielded times the delivery schedule (e.g., for FY83, the number of Howitzers overhauled from the Active Army equals (501 + 545) x 109 = 100). deligial Howitzers and Mi02 Howitzers are overhauled concurrently according to the ratio in which they are replaced in Active Arwy, and then in the Reserves and National Guard (e.g., the number of Mi01Ai Howitzers overhauled in FY83 equals (300 + 501) x 100 = 60: the number of M102 Howitzers equals (201 + 501) x 100 = 40).

For PMS, the MIOIAl and MIO2 Bowitzers will be delivered the same year in which they were overhauled.

FMS Delivery Sch: M102 ^C	•	93	66	208	189	58	1	584

plus 1/2 of the number of XM204 Howitzers produced that same year (e.g., in FY83, the number of Howitzers delivered Mumber of Howitzers delivered in a given year equals 1/2 of the number of XM204 Howitzers produced the prior year equals 1/2(50) + 1/2(168) = 109).

browerhaul schedule is calculated by multiplying the ratio of the number of MIOIAI and MIO2 Howtizers replaced and the number of Kovitzers fielded times the delivery schedule (e.g., for FY83, the number of Movitzers overhauled equals (449 + 493) x 109 = 99).

Fror FMS, the MIDIAL and MID2 Howitzers will be delivered the same year in which they were overhauled.

TABLE A-5. ESTIMATED PMS SELLING PRICE a, b

80% of the standar	d price of \$21,254		17,003 12,820
Test ammunition ^c	FMS Selling I	Price = \$	1,370 31,193
LO2 Howitzer:	<u></u>	,-	
80% of the standar	rd price of \$109,887	· ···= \$	87,910
80% of the standar Overhaul cost ^C Test ammunition ^C	rd price of \$109,887		36,760 1,370

Method to compute FMS selling price and standard prices for the MIOIAI and MIO2 Howitzers were obtained via FONECON between Mr. Aukland, DRSAR-MM and Mr. Trier, DRSAR-SA on 25 April 1977.

bDALO-ILP MSG 132055Z Sep 76 (C).

Data obtained from DRSAR-CPE DF to DRSAR-ASA, subject: 105mm Howitzer Production, XM204, dated 12 April 1977. Cost of test ammunition for the M101Al and M102 Howitzers was assumed equal to the cost of test ammunition that was estimated for the XM204 Howitzer.

27
